STATEMENT OF THE CASE

Encana Oil & Gas (USA) Inc. (“Encana”), seeks an order from the Oil Conservation Division (1) approving its Hutton Canyon Unit; (2) creating a new pool for horizontal wells within the unit area; and (3) allowing for 330 foot setbacks from the exterior of the proposed Unit.
The proposed Hutton Canyon Unit Area consists of 2,563 acres, more or less, of Federal lands situated in all or parts of Sections 11, 13, and 14 of Township 23 North, Range 8 West, and Section 18 of Township 23 North, Range 7 West, N.M.P.M., San Juan County, New Mexico. The Bureau of Land Management has provided preliminary approval of the Unit Agreement. The entire Unit Area will be developed and operated as a single Participating Area.

The Unit Area is currently subject to the Special Rules and Regulations for the Basin Mancos Gas Pool (Pool Code 97232) adopted in 2008 under Division Order R-12984 and the Lybrook Gallup Oil Pool (Pool Code 42289). The Lybrook Gallup Oil Pool is subject to Statewide Rule 19.15.15.9 which requires wells to be located no closer than 330 feet to the outer boundary of a spacing unit, or in this case the outer boundary of the Unit Area. In contrast, Rule C of the Special Rules for the Basin Mancos Gas Pool require wells to be located no closer than 660 feet to the outer boundary of a spacing unit, or in this case the outer boundary of the Unit Area.

In order to allow for the most efficient horizontal well development pattern, and to effectively drain the reserves in the unitized formation underlying the Unit Area, Encana requests that the Division create a new pool for horizontal development within the Hutton Canyon Unit that covers the unitized interval and allows for 330 foot setbacks.
