3R - 277

GENERAL CORRESPONDENCE

YEAR(S):
2003 - 1995
Bill,

I received your attached letter concerning the Ohio "C" Government #3 Site. Marathon sold this facility to XTO Energy on July 1, 2002. Please forward all future correspondence for this site to Nina Hutton with XTO Energy at the address listed in the attachment.

M. Paul Peacock

RE: CASE #3R0277  
OHIO “C” GOVERNMENT #3 WELL SITE  
SAN JUAN COUNTY, NEW MEXICO

Dear Mr. Peacock:

The New Mexico Oil Conservation Division (OCD) has reviewed Marathon Oil Company’s (MOC) June 26, 2001 “OHIO “C” GOVERNMENT WELL #3 SITE, SECTION 26, T28N, R11W, SAN JUAN COUNTY, NEW MEXICO, CLOSURE REQUEST REPORT”. This document contains the results of MOC’s remediation and monitoring of ground water contamination at MOC’s Ohio “C” Government #3 well site in Unit P of Section 26, Township 28 North, Range 11 West, San Juan County, New Mexico. The document also requests closure of the remediation and monitoring actions at the site.

A review of the documents related to this site shows that ground water in monitor well MW-5 is still contaminated in excess of the New Mexico Water Quality Control Commission (WQCC) standards. Therefore, the OCD cannot issue final closure approval at this time. The OCD requires that MOC continue to remediate and monitor the site according to their previously approved work plans. The OCD requests that MOC coordinate their activities with the ground water remedial actions being taken by El Paso Field Services (EPFS) at their adjacent dehydration pit, since MOC’s contaminant plume is commingled with that of EPFS. The OCD will consider issuing final closure approval once ground water from all site monitoring wells is below WQCC standards for a minimum of 4 consecutive quarters.
If you have any questions, please contact me at (505) 476-3491.

Sincerely,

[Signature]

Re: Ohio “C” Government Well #3 Site
 Section 26, T28N, R11W
 San Juan County, New Mexico
 Closure Request Report

CERTIFIED MAIL: P 245 774 617

Dear Mr. Olson:

Please find enclosed a Closure Request Report for the above referenced project. This report documents that the prior removal of source materials and natural attenuation have reduced groundwater benzene levels to the point at which we believe that closure is justified. We thus submit this closure request for your consideration.

Please be advised that I have accepted a transfer with Marathon to Findlay, Ohio. Paul Peacock, of our office, will again be assuming responsibility for this project. You should therefore address all subsequent correspondence to his attention.

Thank you.

Sincerely,

L. Peter Galusky, Jr.
HES Professional

Enclosure as noted.

RE: Ohio “C” Government #3 Well Site  
San Juan County, New Mexico

Dear Sandra,

This correspondence is intended to reiterate what El Paso Field Services (EPFS) and Marathon Oil Company (MOC) agreed to regarding future actions at the Ohio “C” Government #3 facility. This agreement was achieved in a meeting held on November 5, 1998, the attendees of which were G. W. Donaghey, S. D. Miller, M. P. Peacock, and J. L. Vierzbicki.

MOC has agreed to manage and pay for the installation of three to four monitoring wells at the location and conduct an intrinsic bioremediation study incorporating data collected from EPFS’s MW-1. EPFS has agreed to arrange and pay for a survey of the monitoring wells following installation, and conducting sampling and subsequent analysis of groundwater from all monitoring wells once every six months. Analysis will be for the following constituents: benzene, toluene, ethyl benzene, xylene, major cations and anions, and, if a product sheen is present, polynuclear aromatic hydrocarbons (PAH’s).

MOC will install monitoring wells some time in 1999 and inform EPFS of this activity so that survey work may be arranged for and biannual monitoring initiated. A progress report on the project will be submitted to the New Mexico Oil Conservation Division in EPFS’s annual report on behalf of MOC, as it is submitted earlier in the year than MOC’s.

If there are any concerns with MOC’s recollection of the outcome of this meeting, please contact Jenelle Vierzbicki at (915)687-8306.

Sincerely,

Jenelle L. Vierzbicki, CSP

Re: Ohio “C” Government #3 Well Site
San Juan County, New Mexico

Dear Mr. Olson,

This correspondence is being submitted by Marathon Oil Company in response to the Oil Conservation Division’s (OCD) letter of July 9, 1998, requiring a status report on activities conducted at the above-referenced location.

Below is a list of the activities currently in progress or completed:

**Assessment Plan**

A conceptual assessment plan has been developed. Due to the mixing of plumes with contamination from an adjacent pit that was operated by El Paso Field Services, Marathon Oil Company plans to coordinate the assessment work with them. In addition, we plan to use the information collected during their assessment in 1996. Bids have been received from sampling contractors for the assessment work.

Marathon anticipates that assessment work will occur yet this autumn. Information collected from this work will be disclosed in a later status report.

**Archeological Survey**

A contractor is being secured to perform the archeological surveys that are necessary to land use permits from other regulatory agencies. It has been difficult scheduling the archeological survey due to the limited number of qualified contractors.

**Pit Closure**

The pit associated with this site has been backfilled with landfarm soils that had been remediated to OCD standards.
If you have any questions or concerns regarding this project, please contact me at (915)687-8306. Thank you for your assistance.

Sincerely,

Jenelle L. Vierzbicki, CSP

Re: Ohio “C” Government #3 Well Site
San Juan County, New Mexico

Dear Mr. Olson,

Marathon Oil Company is submitting this correspondence as a confirmation of our conversation conducted on Monday, August 17, 1998 regarding an extension in submitting a status report on groundwater remediation and monitoring activities at the above-referenced lease. Pursuant to our conversation, Marathon will provide the requested information by Monday, October 5, 1998.

Marathon intends to conduct additional fieldwork, the findings of which we would like to include in the requested report. An archeological survey of the area over which an investigation is to be conducted and subsequent approvals are still being sought, after which this work will commence.

If you have questions regarding this correspondence, please contact me at (915)687-8306.

Thank you.

Sincerely,

RE: OHIO “C” GOVERNMENT #3 WELL SITE
SAN JUAN COUNTY, NEW MEXICO

Dear Mr. Schatz:

The New Mexico Oil Conservation Division’s (OCD) November 30, 1995 approval of Marathon Oil Company’s (MOC) San Juan Basin Ground Water Investigation Work Plan required that MOC submit an annual report on investigation and remedial activities at all MOC ground water sites to the OCD by October 1 of each year. A review of OCD files shows that the OCD has not received any information since 1995 regarding ground water remediation and monitoring activities at MOC’s Ohio “C” Government #3 well site located in Unit P, Section 26, T28N, R11W or any other site. In addition, information in El Paso Field Services (EPFS) recent annual ground water monitoring report shows an apparent commingling of contaminated waters from EPFS’s former unlined dehy pit and MOC’s former unlined production pit.

Therefore, the OCD requests that MOC cooperate with EPFS to investigate and remediate ground water contamination at the Ohio “C” Government #3 well site. The OCD also requires that MOC submit the previously required annual reports for the San Juan Basin which contain all of the investigation and remediation information required in the OCD’s November 30, 1995 approval of MOC’s San Juan Basin Ground Water Investigation Work Plan. The reports will be submitted to the OCD Santa Fe Office by September 4, 1998 with a copy provided to the OCD Aztec District Office.

If you have any questions, please contact me at (505) 827-7154.

Sincerely,

William C. Olson

RE: OHIO "C" GOVERNMENT #3 WELL SITE

Dear Mr. Schatz:

The New Mexico Oil Conservation Division (OCD) has reviewed Marathon Oil Company's (MOC) undated correspondence which was received by the OCD on September 18, 1995. This document contains MOC's notification of the discovery of ground water contamination during pit closure actions at the Ohio "C" Government #3 well site located in Sec. 26, T28N, R11W, 1090'FSL, 990'FEL, NMPM, San Juan County, New Mexico.

Based upon a review of the above referenced document, the OCD requests that MOC submit an investigation work plan to the OCD by December 18, 1995. The investigation work plan will contain MOC's plan for determining the extent of contamination related to MOC's activities at the site.

If you have any questions, please call me at (505) 827-7154.

Sincerely,

William C. Olson

Santa Fe, New Mexico 87505

Dear Mr. Olsen:

This letter is written notification that follows our telephone conversation last week informing the NMOCD that ground water contamination was discovered during pit closure activity at the Ohio Government “C” well #3, located in Kutz Canyon, San Juan County, New Mexico. Attached is a copy of test results of a ground water sample taken from a pit at the wellsite. The sample contains 104 ug/L of benzene, above the 10 ug/l regulatory level for this constituent. A legal description of the well site is listed below.

Ohio “C” Government #3, Sec. 26, T28N, R11W, 1090'FSL, 990' FEL.

If you have any questions or need additional information please contact me in Midland at (915) 687-8308.

Sincerely,

Barry Schatz
